

ImaSight 4600 gets FDA Clearance

Gatineau, QC, September 14, 2009 - ImaSight Inc. announces today that it obtained its clearance for the ImaSight 4600 digital x-ray sensor.

ImaSight has been selling its chiropractic product to the Canadian market (with Health Canada clearance) for more than a year and is proud to announce that the U.S. Food and Drug Administration (FDA) has cleared the ImaSight 4600 for sales in the United States. Our major distributors are now beginning to offer the ImaSight 4600 to the U.S. chiropractic and medical markets.

The company has secured an investment of \$500 thousand to provide marketing and sales effort in those new markets opened by the FDA clearance.

Paul Hindo, chairman of the Board commented "Our shareholders are excited about the success and potential of our products in U.S.A. and Canada. We want to speed up the marketing strategy and address other markets quickly. Our reputation of product reliability and end users technical support is amongst the best and this will facilitate new market introduction."

ImaSight Inc., exclusively focusing on x-ray imaging markets, will increase its presence in North America as well as in Europe and Latin America where new partnerships are developing.

"ImaSight continues to improve its products for new markets and increase user functionality. Professionals want a reliable system that will last and evolve with their clinic needs." said Jean Caseault, president and founder of ImaSight Inc.

About ImaSight

ImaSight markets its patented digital x-ray sensor to veterinarians and chiropractors. Its hospital grade sensor has been cleared by FDA and Health Canada. Further information can be found at www.imasight.com.
